**Quick setup — if you've done this kind of thing before**

Set up in Desktop or HTTPS SSH <https://github.com/johnatawnclementawn/cmpt220clementi.git>

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

**...or create a new repository on the command line**

```
echo "# cmpt220clementi" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/johnatawnclementawn/cmpt220clementi.git
git push -u origin master
```

**...or push an existing repository from the command line**

```
git remote add origin https://github.com/johnatawnclementawn/cmpt220clementi.git
git push -u origin master
```

**...or import code from another repository**
